Python Basic Task 2

- **Solve these statements using Python code:**

Statements

1. Convert the current date time in the given format using python:

```
Tuey Nov 07 19:53:23 2023
```

2. Convert the given date "11-07-23" into "/" format.
3. Change "S" of "Student" into first three letters of your name using python.
4. Extract the word "student" from the string "absjfiestudentjdhfk". (Hint: Use RegEx)
5. Create a text file in the current directory and store any 4 lines.
6. Read the file and print the first line.
7. Read the file and print all the text in it.
8. Create an array using Numpy.
9. Create a 3-Dimentional array with 6 rows.
10. Create a 3-Dimentional array and print 3rd element of the 2nd row.

Best of luck
